## WORLD FOOD INDIA 2023

The Indian food processing sector has grown rapidly with an average annual growth rate of 9 percent in the last five years. The sector facilitates strong linkages between industry and the agriculture sector through a wide range of activities, including farming, aggregation, processing, packaging, storage, and distribution. The sector has also witnessed immense surge of opportunities in its champion sectors like frozen food, ready to eat/ready to cook products, millets/nutri-cereals etc.

Recognising the potential of food processing sector in transforming India as the food basket of the world, the Ministry of Food Processing Industries, Government of India has adopted measures to channelise investments in food processing sub-segments. This includes backward linkages, food processing

equipment, processing related R&D, cold chain storage solutions, start-ups, logistic & retail chains, encompassing the entire food processing value chain.

With the objective of introducing the world to rich Indian food culture as well as promoting investments in the diverse food processing sector of the country, the Ministry of Food Processing Industries launched the first edition of World Food India in 2017. In view of celebrating 2023 as the International Year of Millets and to bring global food processing industry together, the Ministry is organising the second edition 'World Food India 2023' from 3-5 November 2023 at Pragati Maidan, New Delhi
