

Advisory to Indian students intending to study in Malta

All Indian students intending to join universities and colleges in Malta are advised to make necessary inquiries and consider the following before they apply for admission:

- **Please ensure that the college/university has proper accreditation and recognition in Malta.**
- **It is advisable that students directly approach the colleges for admission instead of applying through agents. Students must also check all the information directly from the University/college regarding duration of the course, course fee and terms and conditions regarding their student visa.**
- **It is also advisable that admission fee is deposited with the university/college directly and after obtaining Maltese visa. If some university/college insists on deposit of admission/tuition fees before appropriate visa is granted, written prior assurance may be sought from the respective university/college for refund of fees, in case the student is unable to join the institution due to unavoidable circumstances such as refusal of long-term visa.**
